

R·B

MATILDA OAK WALLPAPER - WOVEN BASE

➤ MATERIALS

Cellulose, polyester, binder, mineral pigments.

➤ DIMENSIONS

Repeat (vertical): 33cm

Repeat (horizontal): 70cm

Width: 134cm (including 2cm over engraving)

Minimum order: 11 linear metres

➤ PRINTING

The printing process uses water based pigments that are suited for textiles and wallpaper.

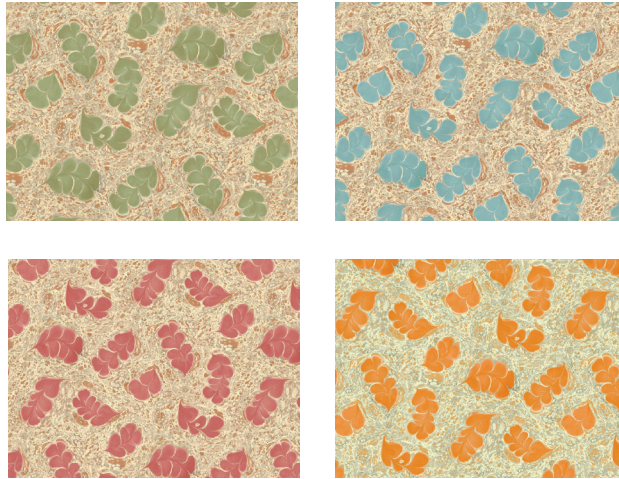

➤ BENEFITS

Epson Resin inks work in much the same way as HP Latex inks. The colour will last longer than prints produced with inks that contain dyes, but nonetheless they will start to fade over time depending on the intensity of UV light exposure.

The printers use a four-stage curing module providing users with exceptional colour consistency, allowing for accurate panel to panel colour accuracy. Using Epson Resin ink allows less distortion as the ink can cure at lower temperatures so the materials are less likely to warp or change length.
