

R·B

MARbled WALLPAPER - WOVEN BASE

➤ DIMENSIONS

Repeat (horizontal): 33cm

Repeat (vertical): 68.15cm

Width: 130cm

Match: Straight

➤ MATERIALS

Cellulose, polyester, binder, mineral pigments.

➤ PRINTING

Prints produced with inks that contain pigments, such as HP Latex Inks, tend to last longer than prints produced with inks that contain dyes. Your print will begin to fade over time depending on the intensity of UV light exposure.

The addition of an anti-scratch agent provides a high level of scratch resistance on smooth, uncoated media—scratch resistance of HP Latex Inks is higher than competitor eco- solvent inks and comparable to hard solvent inks on self-adhesive vinyl and PVC banner. This high level of scratch resistance significantly reduces the risk of accidental damage during the finishing, installation, and display of unlaminated graphics.

➤ HOW TO CARE FOR YOUR PRODUCT

Cleaning any contaminants on the wallpaper can be done by washing with a mild detergent, rinsing with clean water and drying with a soft cloth. Only use a cream cleanser if there are marks by an ink ball point pen.

➤ HANGING

Use a pre-mixed, heavy duty, proprietary brand such as Solvite, Polycell or Halls B-Line and apply the adhesive to the wall.
